CONCEPT: RETAINED EARNINGS -- PRIOR PERIOD ADJUSTMENT

GAAP requires an adjustment to the bala	nce of retained earnings in the following cases:
$\hfill\Box$ The discovery of an error from a previous period (i.	e. an expense that was not taken in the previous year)
- An unrecorded expense/loss from a previous peri	iod will the retained earnings balance
- An unrecorded revenue/gain from a previous peri	od will the retained earnings balance
The accountant at Overlook Corporation discovered a \$40,000 account. However, the legal fees were related to a court case Journal Entry:	•
□ A change in accounting used in re	cord-keeping also requires a restatement of retained earnings
- The most common example is a change in inventory methods (FIFO, Weighted-Average, LIFO)	
- In this course, you will not need to calculate the a	mount, it will be given
The Inventory Company has consistently used the weighted-average method to account for inventory and COGS. During the current year, the company decided to switch to the FIFO method. The cumulative effect of the change in accounting principle was a \$40,000 increase to Inventory.
