

## TOPIC: CONTEMPORARY PSYCHOLOGY: PUTTING IT ALL TOGETHER

◆ The following timeline shows the rise of the major subfields of psychology:

Perspectives Being Used Today*	Less Prominent Today, But Principles are Still Used	Considered Historical Perspectives
Social psychology Cognitive psychology Biological perspective/Neuroscience Developmental psychology Evolutionary psychology Cultural Psychology	Psychoanalysis Behaviorism Gestalt Psychology Humanism	Structuralism Functionalism

\*There are more subfields of psychology – these are the most prominent.

**Think Like a Psychologist:** All these perspectives are important! Humans are *infinitely* complex – considering behavior, cognitions, and mental processes through **multiple** lenses allows us to gain a more holistic understanding of psychology.
